# Christopher J. Banks

# 1220 Mecaslin Street NW, Atlanta, GA 30318 | (757) 535-6583 | cbanks34@gatech.edu

#### **Education**

Ph.D.	Student, Robotics. Georgia Institute of Technology.	2017
B.S.	Physics, Computer Science Minor. Summa Cum Laude. Norfolk State University	2013

# **Awards**

National Science Foundation (NSF) Graduate Research Fellowship Program (GRFP) Fellowship	2017
Dozoretz National Institute of Mathematics and Applied Science (DNIMAS) Scholar	2013

### **Research Interests**

Swarm robotics, linear temporal logic, human-swarm interaction, control theory, machine learning

# OS & Programming Language Experience

Programming Languages - C++ | Python | MATLAB

OS experience - Linux (Ubuntu, Redhat) | Robot Operating System (ROS)

# **Research Experience**

# Ph.D. Student, Robotics, Georgia Institute of Technology

August 2017 - present

- Created end-to-end platform for the use of temporal logic formula in trajectory generation for quadcopters
- Lead software developer for quadcopter integration into the Robotarium, a remotely accessible robotics testbed at Georgia Tech
- Member of the Robotarium team that manages user input to the system and software updates

#### Research Intern, Thomas Jefferson National Accelerator Facility

October 2016 - July 2017

- Studied conventional and hybrid meson structure through photoproduction experiments
- Analyzed the decay states of the phi and omega mesons to find resonance patterns, indicating possible particle production
- Used Perl and Python as a software development platform to contribute to creating a framework for partial wave analysis

### Research Intern, Massachusetts Institute of Technology (MIT)

**June 2016 - August 2016** 

- Participated in automated planning artificial intelligence research
- Integrated a human user in the planning process of an automated planner to improve the plan's efficiency
- Used C++ in a Linux environment to create a file handler and automated planner generation environment and co-authored 1 research paper

## **Honors, Activities & Outreach**

National Society of Black Engineers (NSBE) Member

FIRST Robotics Mentor

#### **Selected Publications**

Kim, Joseph, **Christopher J. Banks**, and Julie A. Shah. "Collaborative Planning with Encoding of Users' High-Level Strategies." *AAAI*. 2017. (published)

**Banks, Christopher J.,** Kyle Slovak, Samuel Coogan, Magnus Egerstedt. "Specification-Based Maneuvering of Quadcopters Through Suspended Hoops." 2018. (submitted for review)
